Skills:

- React (Intermediate)
- Node (Beginner)
- Git (Beginner)
- SQL Database (Beginner)
- Adobe Illustrator (Mid-Level)
- C++ Language (Mid-Level)
- C # (Mid-Level)

Education

DHA Suffa University / BSCS (2.79 CGPA)

January 2019 - Present (Graduation Year 2023)

Completed 7th Semester (3.24 SGPA) 4th year

Project

- Sign Language Recognition using Machine Learning Techniques

  - ❖ We developed a system using Machine Learning that would understand the sign language from deaf amd dumb people and illustrate their messages in English language so that normal people can easily understand them.

- CAR Parking Reservation System (React.js)

- TODO List Application (Learning Project For React)
- Hangman Game using C++ Language
- Mobile Shop Management System using C# Language

  - ❖ Create friendly GUI for the management of customer entries and manage all the mobile shop related products with updated value prices.
- Hospital Management System using C# Language

  - ❖ Create Graphical user interface for the hospital where the patient can get an appointment to the doctor and allotted with the token number and appointment also. So the patient gets an appointment hussle free.

- A Static Website of a Restaurant
- Hangman Game using C++ Language
- Tic Tac Toe Game using Assembly Language
- First Aid Medical Management System using C Language

    - ❖ It is a console based program. The scenario of this project is that people are very unaware of the first-Aid for the small issues. So through this program they select their issue and get the remedies and the first-Aid solution.
