PROFESSIONAL SUMMARY

Software Engineer with 5+ years of experience designing, building and scaling full-stack web and mobile products. Currently building a multi-vendor B2C marketplace and a B2B wholesale marketplace end to end at The Exact Solutions, owning core modules such as payments and escrow, the Buy Box algorithm, settlements, contract pricing and RFQ workflows. Chooses languages and frameworks by the problem, with deep hands-on experience in TypeScript, JavaScript, SQL, React, Next.js, Node.js, Nest.js and React Native. Has delivered products across e-commerce, fintech, healthcare, education, IoT and real estate for teams in Pakistan, Poland, the US and Australia.

CORE EXPERTISE

- B2C & B2B marketplaces
- Full-stack architecture
- Authentication & RBAC
- Payments, escrow & settlements
- REST APIs & integrations
- Performance optimisation
- Pricing & Buy Box algorithms
- Database design & optimisation
- Web & mobile (React Native)

PROFESSIONAL EXPERIENCE

Software Engineer · The Exact Solutions, Poland

Jun 2025 – Present

- Build and scale two marketplaces end to end: a multi-vendor B2C platform and a B2B wholesale platform.

B2C Marketplace · Shoppers and independent sellers

- **Payments & escrow:** Built escrow holding funds until delivery, with auto-release, refunds and chargebacks.
- **Buy Box algorithm:** Developed offer ranking that picks the winning seller by price, rating, fulfilment speed and stock.
- **Settlement engine:** Built split payments, commission rules and scheduled seller payouts on a double-entry ledger.
- **Order management:** Built multi-seller order splitting, a fulfilment state machine, returns and refunds.
- **Search & discovery:** Implemented faceted search and relevance ranking across a growing multi-seller catalog.
- **Trust & safety:** Built fraud and risk checks, dispute resolution and seller performance scoring.

B2B Marketplace · Business buyers and wholesale suppliers

- **Contract pricing engine:** Built customer-specific price lists, tiered volume breaks and negotiated contract rates.
- **RFQ & negotiation:** Built multi-round buyer–supplier quoting that converts accepted quotes into orders.
- **Trade credit & invoicing:** Implemented credit limits, Net 30/60 terms, purchase orders and automated invoicing.
- **Procurement approvals:** Built multi-level approval workflows, budgets and spend controls per company account.
- **Multi-tenant accounts:** Designed company hierarchies with granular RBAC for buyers, approvers and suppliers.
- **ERP & integrations:** Built catalog, inventory and order sync with supplier systems over REST APIs and webhooks.

- Integrate payment gateways with webhooks, idempotent transactions and ledger reconciliation.
- Implement authentication, authorization and role-based access control (RBAC) across multi-tenant accounts.
- Own backend architecture, data flow and API performance; enforce best coding practices across the stack.

Software Engineer · The Finit Systems, New York

Dec 2024 – Jun 2025

- Led full-stack development across backend services, database design and frontend.
- Built scalable, high-performance web applications with React, Next.js, Node.js and MySQL.
- Designed relational schemas and REST APIs with performance and maintainability in mind.
- Upheld code quality, scalability and maintainability in a collaborative team.

Software Engineer · Geeks of Kolachi, Karachi — Sep 2022 – Dec 2024

- Developed scalable web and mobile apps with React, React Native, Next.js, Node.js, Express and MySQL.
- Delivered products for international clients across fintech, healthcare, education, IoT and real estate.
- Integrated payments, real-time chat, multi-language support and third-party APIs, including OpenAI.
- Applied JavaScript and TypeScript across full-stack projects, ran client demos and delivered performance optimisations.

Software Engineer Intern · Trukkr.pk — Mar 2022

- Assisted in software development and testing, collaborating with engineers to resolve issues.

Software Engineer Trainee · Jeddah Tech — Jun 2021

- Foundational training in software development, coding practices and team collaboration.

KEY PROJECTS

IoT Data Platform · Web application
Collects data from IoT devices for real-time insights and analytics, with an integrated digital wallet for secure transactions. Built the Node.js backend and a server-rendered Next.js frontend.
Next.js · Node.js · SSR

Transporter Portal · Web & mobile
An Australian product for managing EV fleets. Built fintech features in React Native and maintained the web portal for transaction visibility.
React Native · Redux · React Navigation · React · Emotion

Advanced Assessment Platform · Web application
A structured quiz platform for measuring skills, with an interactive landing page, secure authentication, profiles and detailed result feedback.
Next.js · Nest.js

Real Estate Website · Website
A high-performance, fully responsive landing site.
Next.js · Tailwind CSS

Immigration Portal · Web application
Helps people relocate internationally with resources, tools and personalised guidance. Feature development, Stripe payments, multi-language support and an admin portal for transaction visibility.
React · Context API · Node.js · MySQL · Stripe · Material UI

Advanced Educational Platform · Web application
Tools for students and researchers. Led the front-end, and built authentication, real-time chat and citation features on top of integrated APIs.
React · REST APIs · Real-time chat

Healthcare Assessment App · Mobile application
Patient assessment app with OpenAI-powered responses, built to be responsive and accessible across devices.
React Native · OpenAI

TECHNICAL SKILLS

Languages	TypeScript, JavaScript, SQL, HTML, CSS
Frameworks & libraries	React, Next.js, Node.js, Express, Nest.js, React Native, Redux, Tailwind CSS, Material UI
Databases	MySQL, MongoDB
Tools & platforms	Git, GitHub, AWS, Firebase, Stripe
Domains	B2C marketplaces, B2B marketplaces, Fintech, Healthcare, Education, IoT
Ways of working	Agile, Scrum

EDUCATION

Bachelor's in Computer Science
DHA Suffa University · 2019 – 2022

Intermediate
Govt Degree Science College, Johar · 2020 – 2022

CERTIFICATIONS

- Advanced React — Meta
- Build a Server Rendered Website with Next.js
- React JS along with Modern JavaScript
- JavaScript Algorithms and Data Structures
- Front End Development Libraries
- Certified Adobe Illustrator Designer
