SHAHZAD SALEEM

SOFTWARE ENGINEER

+92 335 9202400

mirzashahzadsaleem021@gmail.com

https://github.com/MirzaShahzadSaleem

SUMMARY

A passionate Software Engineer with **4+ years** of experience in **full-stack development**, specializing in **React, Next.js, Node.js, and database design**. Adept at building **scalable web and mobile applications** with a strong focus on **performance, user experience, and maintainability**. Experienced in working across teams and delivering **high-quality solutions** in agile environments.

EDUCATION

DHA SUFFA UNIVERSITY
Bachelor's Degree in Computer Science 2019 – 2022

Govt Degree Science Collage- Johar
Intermediate 2020 – 2022

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML, CSS, SQL
Frameworks & Libraries: React, Next.js, Node.js, Express, React Native, Nest.js, Redux, Tailwind CSS, Material UI
Databases: MySQL, MongoDB
Version Control: Git, GitHub
Tools & Platforms: AWS,Firebase
Methodologies: Agile, Scrum

SKILLS

- Strong organizational and time-management skills
- Exceptional communication and interpersonal skills
- Ability to work independently and as part of a team
- Detail-oriented and able to handle multiple tasks simultaneously

CERTIFICATIONS

- Advance React by Meta
- Build a Server Rendered Website with Next.js
- React JS along with Modern JavaScript React JS
- JavaScript Algorithms and Data Structures
- Front End Development Libraries
- Certified Adobe Illustrator Designer

PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER
THE EXACT SOLUTIONS (Poland) | JUNE 2025 – Present
- Driving full-stack development of web applications using React, Next.js, Node.js, and MySQL.
- Implementing authentication, authorization, and role-based access control (RBAC).
- Enhancing application performance and ensuring best coding practices across the stack.
- Writing clean, modular code with a focus on backend architecture, data flow, and API efficiency.
- Collaborating with cross-functional teams to deliver scalable and maintainable features.

SOFTWARE ENGINEER
THE FINIT SYSTEMS (New York) | DEC 2024 – JUNE 2025
- Leading full-stack development, including backend, database design, and frontend.
- Building scalable, high-performance web applications using React, Next.js, Node.js, and MySQL.
- Ensuring code quality, scalability, and maintainability in a collaborative team environment.

SOFTWARE ENGINEER
GEEKS OF KOLACHI | SEPT 2022 - DEC 2024
- Developed scalable web/mobile apps with React, React Native, Next.js, Node.js, Express, and MySQL.
- Applied JavaScript & TypeScript across full-stack projects.
- Conducted client demos and implemented performance optimizations.

SOFTWARE ENGINEER INTERN
TRUKKR.PK | MARCH 2022
- Assisted in software development and testing; collaborated with engineering teams to resolve issues..

SOFTWARE ENGINEER TRAINEE
JEDDAH TECH | JUNE 2021
- Received foundational training in software development, coding practices, and team collaboration.

MAJOR PROJECTS

IoT Devices-Integrated Data Platform — *(Web Application)*

This project is a cutting-edge platform that integrates IoT technology to gather data from various devices and utilizes a digital wallet for seamless transactions. The project involves both backend and frontend development, focusing on ensuring efficient data handling and user-friendly interactions.

- The backend was developed using Node.js for robust and scalable performance.
- Frontend developed using Next.js for server-side rendering and optimal performance.
- Integrated a digital wallet feature for secure and efficient transactions.
- Implemented data collection from various IoT devices to provide real-time insights and analytics.
- Ensured seamless integration between the frontend and backend systems.
- Focused on creating a responsive and intuitive user interface.

Advanced Educational Platform — *(Web Application)*

This project is an advanced educational platform focused on providing students and researchers with a range of tools and resources to enhance their learning and research experience. The project was primarily centered on front-end development, from designing the interface to developing and integrating APIs to make the platform fully functional.

- Led the front-end development using React and modern JavaScript frameworks.
- Designed and implemented a user-friendly interface ensuring a seamless user experience.
- Integrated various APIs to enable core functionalities like authentication, chat, and citation features.
- Developed authentication mechanisms for secure user access.
- Implemented a real-time chat feature to facilitate communication among users.
- Added citation tools to help users easily reference academic sources.

Healthcare Assessment Platform — (Mobile Application)

A healthcare web application for conducting assessments for better understanding of patients.

- Patients can get a response from the OPENAI
- Ensured responsiveness and accessibility across all devices

Advanced Assessment Platform — *(Web Application)*

This project is a comprehensive assessment platform designed to evaluate users' skill sets through a structured quiz system. This project includes a landing page that directs users to the Quiz App, where they can take various assessments to measure their competencies in different areas.

- Developed using the Nextjs & Nest.js.
- Implemented a dynamic and interactive landing page for user engagement.
- Created a robust quiz application to facilitate skill assessments.
- Ensured data security and integrity throughout the application.
- Provided detailed results and feedback to users based on their quiz performance.
- Integrated user authentication and profile management features.

Immigration Portal— *(Web Application)*

This Project is a product of a very renowned PHD doctorate and it is an innovative web application designed to assist individuals in migrating from their current country of residence to another. This platform simplifies the often complex and overwhelming process of international relocation by providing users with comprehensive resources, tools, and personalized guidance. Its user-friendly interface and intelligent features make it an indispensable tool for anyone looking to embark on a new journey abroad.

- Responsible for feature development using React, ContextAPI, Node JS, MySql
- Integrate Stripe as a payment gateway
- Multilanguage Support available
- Maintaining admin portal for transaction visibility using React, material UI(styled component)

Real Estate — (Website)

A meticulously crafted landing page designed to offer a seamless and engaging user experience. The site leverages the robustness of Next.js combined with the flexibility of Tailwind CSS to ensure high performance and responsiveness across all devices.

Transporter Portal— *(Web Application)*

An Australian-based application in which they manage their EV vehicles and also vehicles

- Responsible for feature development for fintech using React Native, Redux, React Navigation 6
- Maintaining web portal for transaction visibility using React, material UI, Emotion(styled component)
